

Forslight Alusteel 3-part

Center part

6-light side

4-light side

This is a variant of the Forslight alusteel lightbar divided into three parts for installation on trailers with tail lifts. The frame consists of two aluminium profiles and two stainless steel sheets glued together, two plastic end caps with LED side marker lights on the side parts. The length of the parts can be varied according to what the customer wants.

Length (width)	center part 895 mm, side parts 325-495 mm
Height	320 mm
Lights	Hella lights with <ul style="list-style-type: none">- Stop/park lights,- Fog light,- Reverse lights,- Direction indicators- 2 Nordic 300 work lights- 2 x Jokon license plate lights

A moisture tight plastic connection box is on the rear center of the center part. All bushings are moisture tight.

Other lights, i.e. different multifunction lights can also be used, as well as LED lights.

Please note! The lights that exceed the number of what is permitted are for cosmetics only and are not connected when the lightbar leaves our factory. The use of these lights is entirely the responsibility of the owner/driver of the truck
